

in app.js

```
import lotion from 'lotion';
import { handler as CeladonHandler } from 'celadon';

let app = lotion({
  devMode: true,
  initialState: {
    ...data
  }
});

app.use(CeladonHandler);
app.listen(3000);
```

choose your NPOs

```
<!-- customize NPOs -->
donateTo() // default to celadon_wallet
donateTo('cosmos_walet')
donateTo(['cosmos_walet', 'impacthub_wallet', 'andy_wallettttttt'])
```
